ISI Training Center

Consultancy Accomplishes, Involvement in US military, police training and security services.

- 1. Houston, Texas** (October 31, 2011) – ISI Training Center is a Houston based corporation established in 1999 announces its subcontracting agreement with Raytheon Technical Services Company, Warrior Training Alliance (WTA) and the Warrior FOCUS Program. ISI will be involved in upgrading and sophisticating the operational capabilities of the American combatant and be a part of a global security force.
- 2.** ISI Training Center announces the opening of its 3000 acres training facility, located in McGregor, Texas, approximately 35 miles from Fort Hood and approximately 20 miles from Waco, Texas. The facility is located in the very heart of Texas, 120 miles equidistant between the Dallas/Fort-Worth Metroplex and Austin, Texas.

ISI is an American Owned corporation that has trained members of all U.S. military branches including some of the most elite Special Forces, SWAT teams and police First Responders in the country. ISI's advanced tactical training and security services are based on the integration of techniques and best practices from the US and Israel that are proven, effective and field tested. ISI has a solid track record of improving both the skill and readiness levels of the personnel trained and services provided.

Founder and President Hanan Yadin is a veteran commander in the Israel Defense Force (IDF) and a former member of Israel National Counter-Terrorism Agency (Shin-Bet) brings 25 years of experience in instruction, tactical and counter-terrorism fields to police, military and government agencies.

“Current world conditions and domestic terrorism in the US is in its alarming rates” says Yadin. “We bring fresh eyes to standard training and security practices. We look at details that otherwise will be overlooked. This approach allows us to spot vulnerabilities, upgrade and enhance the skill set of both the individual and team to make them better and save lives”.

While courses and security services offered by ISI may be similar in name to others, they differ in that they are based on decades of Israeli experience and employ new and proven techniques that U.S. teams have not have otherwise been exposed to. “An effective integration of Israeli experience into American practices is the winning combination”, Yadin concludes.

ISI clients recognize the critical advantage the company has to offer:

“Mr. Hanan Yadin and his staff were top notch instructors. I would recommend them to teach the entire Armed Forces and I mean this sincerely, the training was very informative and it really helped our paratroopers to become better warriors. I hope that every military unit gets a chance to be taught by these silent professionals of ISI”. MSG Anthony L. Waddy, NCOIC ABN Leaders Course, 82nd ABN Division

“Mr. Hanan Yadin is of impeccable character, honor and integrity. His dedication, commitment and loyalty to this great country are without question. His commitment to training our military, civilian law enforcement and security has already had a major impact in mitigating, preparedness, response and recovery from major potential violent attacks. His morals, ethics and training standards are among the highest. His contributions to saving human life are of immeasurable value”, attest George D. Little, Director, Institute for Criminal Justice Studies.

Over and over, we receive feedback that ISI training and services complements U.S. standards and that by having new and alternative techniques in their “toolbox” ISI’s trainees and operators come out with two critical advantages – a better ability to effectively achieve their mission objectives and increased survivability.

611699 - All Other Miscellaneous Schools and Instruction
611710 - Educational Support Services
928110 - National Security

Aviation Services

ISI has developed resources throughout the Middle East, Europe and India to provide a wide variety of both fixed wing and rotary wing aircraft for operations into and within Afghanistan. As important as aircraft access is, our relationship with international trip support companies, provides us with a premier resource to arrange both Diplomatic clearances as well as critical fuel credit within country as supplies are available.

Fuel

As fuel is a critical component to any air operation, we would also look at options to deliver fuel to destinations that might have security challenges if transported by ground.

Weather

In addition we also have access to other resources critical to movements within the region such as weather forecasting for both aviation and marine interests. We are confident that with proper planning, we are able to commit a multitude of resources to support asset movements when needed.
